Art Unit: 2652

Claims 3-34 are now pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/20/05 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

2. Claims 19-20, 23-26, 30-31, 33 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admitted prior art (AAPA), i.e., FIGs. 2A-2B. The AAPA shows a composite slider body, having a front portion 42 composed of a first material, e.g., AlTiC, a rear portion 44 composed of a second material, e.g., Al₂O₃, different from the first material; an air bearing surface which comprises a leading ABS portion 40 formed in the front body portion; a trailing ABS portion formed in the rear portion, i.e., which includes the ABS portion on the center of the rear pad of which the basecoat 46 forms; (as per claim 20) wherein the thickness of the first material is "as much as 15 times" a thickness of the second material; (as per claim 23) wherein the lapping durability of the first material is greater than the second material; (as per claims 25-

Art Unit: 2652

26) wherein a single latitudinal plane separates the front portion from the rear, and the front portion is composed entirely of the first material and the rear portion is composed entirely of the second material. Further, with respect to claims 19 & 30, FIGs. 2A-2B also show the interface, dashed line 50, shown in the figures, depicts a drop in elevation on the interface line on the middle pad/rail where the magnetic head is positioned.

Allowable Subject Matter

- 3. Claims 3-18, 27-29 are allowable over the prior art of record.
- 4. Claims 21-22, 27-29, 32, 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

- 5. Applicants amendments to the claims and subsequent arguments filed 12/20/05 have been fully considered but they are not entirely persuasive.
- A...With respect to the AAPA, Applicants' assert that "Figs 2A-2B fail to disclose any interface, much less an air bearing surface containing an interface 50 that has a change in elevation, as does the present invention (as shown in Figs. 5A-5B and7A-7B)."

The Examiner respectively disagrees. It is considered that the now claimed "change in elevation" is depicted in FIGs. 2A-2B, as the interface, i.e., dashed line 50, shown in the figures, depicts a drop in elevation on the interface line on the middle pad/rail where the magnetic head is positioned. Therefore, this rejection is maintained.

Application/Control Number: 09/884,796 Page 4

Art Unit: 2652

B...The amendments to the other claims, which Lille was previously applied to, with respect to this "change in elevation at an interface", has overcome these rejections, since Lille does not teach or suggest any particulars of the air bearing surface, although there is necessarily one.

These claims have therefore been indicated as otherwise allowable.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian E. Miller whose telephone number is (571) 272-7578. The examiner can normally be reached on M-TH 7:15am-4:45pm (and every other Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T. Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center

(EBC) at 866-217-9197 (toll-free).
